# ACHIEVING PEAK PRODUCTIVITY THROUGH TECHNOLOGY AND INNOVATION

Technology and innovation are essential elements for construction industry players to be productive and competitive in the international arena. New materials, energy sources, innovative design approaches, as well as advances in digital technology and big data are creating a wave of rapid changes within the industry.

New applications and tools are abound and are set to change how companies design, plan and execute construction projects. These new development could not have come at a better time since construction projects are becoming increasingly complex, putting companies under tremendous pressure in their effort to deliver on time and within budget.

The International Construction Transformation Conference 2018, bring regional and international experts to discuss the impact of technology and innovation in the construction industry productivity.

The Ministry of Works Malaysia and the Board of Engineers Malaysia (BEM), Board of Architects Malaysia (BAM), Board of Quantity Surveyors Malaysia (BQSM) and Wanita Industri Binaan Wanita (WIBM) proudly bring to you **Konvensyen Usahanita Binaan 2018 (KUBINA2018) themed Women Leaders Spearheading Transformation and Innovation in Construction**. KUBINA2018 provides a platform to build intellectual and active discussions, professional networking, opportunities and business potential, while allowing participants to exchange ideas and views of the construction industry.
